## Experiences

**Full-Stack Engineer** | **PioneerDev AI** — **March 2026 – Present**
*Next.js, Prisma, Supabase, Cloudflare* — *Remote | Colorado, United States*

- Contributed to an AI Creative Studio for image, video, and audio generation within a 10-person engineering team, adopting ticketing systems, PR-based code reviews, and AI-automated reviews.
- Owned end-to-end delivery of Influencer Studio, covering persona management, multi-modal content generation, optimistic posts feed with cursor pagination, and in-flight job recovery.
- Shipped tRPC routers on a production feature, designing protected procedures with Zod-validated inputs wired through TanStack Query for type-safe server-client communication.
- Built async AI generation pipelines using Trigger.dev, enqueuing long-running image, video, and audio jobs as background tasks with Realtime and polling-based completion UX.
- Adopted Sentry and structured logging across API and task boundaries for production-diagnosable backend observability.
- Worked across a Dockerized local environment and multiple Cloudflare-deployed stages (alpha, staging, prod).

**Full-Stack Developer** | **AppQuant** — **May 2025 – February 2026**
*Next.js, Prisma, Supabase, Vercel* — *Remote | Pasig, Philippines*

- Owned and engineered an AI-powered CRM Platform featuring workspaces, analytics, notifications, screen recordings, inventory management, quote/invoice generation, and AI-driven outbound calls.
- Automated outbound calls by integrating ElevenLabs Conversational AI and OpenAI for post-call sentiment analysis, summaries, and personalized follow-ups.
- Built a secure payment and subscription pipeline using Stripe, handling billing flows, webhooks, and subscription lifecycle management.
- Integrated Resend for transactional email delivery and Twilio for SMS and calling features, enabling reliable user communication across multiple channels.
- Managed database integrity and security by handling Prisma migrations and configuring Row-Level Security (RLS) in Supabase to enforce secure multi-tenant data access.
- Optimized API performance using Redis (Upstash) for caching and rate limiting, designed efficient Prisma schemas, and indexed high-traffic queries to reduce latency.
- Managed deployment on Vercel using GitHub workflows and preview environments, and implemented Vercel Cron Jobs for automated reminders and notifications.

**Developer – Intern** | **Kynatech** — **September 2024 – October 2024**
*Next.js, Prisma, Supabase, Vercel* — *Remote | Taguig, Philippines*

- Developed a time tracking application within a 2-month period, including authentication, REST APIs, and database integration.
- Translated Figma designs into responsive Next.js components and pages using Tailwind CSS and Shadcn UI (Radix UI-based), ensuring strict adherence to UI/UX specifications.
- Collaborated in an Agile environment, participating in daily stand-ups, and end of day meetings to maintain alignment, track progress, and quickly address blockers.

## Skills

**Languages:** TypeScript, JavaScript, Python, SQL
**Frontend:** React.js, Next.js, Tailwind CSS, Shadcn UI, Motion, Zustand, TanStack
**Backend:** Next.js, Express.js, FastAPI, Prisma, Supabase, PostgreSQL, MySQL, Redis, tRPC, REST APIs
**Tools:** Cursor, Claude Code, Vercel, Cloudflare, Git/Github, Docker, Postman, Sentry

## Education

**Bachelor of Science in Computer Science** — **September 2021 – August 2025**
*Bataan Peninsula State University – Main Campus* — *Bataan, Philippines*
