EXPERIENCES

Full-Stack Engineer | PioneerDev AI

March 2026 – Present

Next.js, PostgreSQL, AI Integration, Cloudflare, AWS

Remote | Colorado, United States

- Shipped production features across multiple client projects, ramping quickly into unfamiliar tech stacks and business domains to deliver under fast-paced timelines.
- Collaborated within cross-functional engineering teams using ticket-driven, AI-assisted development workflows, adapting to each project's tools, conventions, and team dynamics.
- Diagnosed API and database bottlenecks with Sentry, then resolved them through Redis caching and targeted Prisma/SQL indexing.

Tenext — B2B Customer-Engagement Platform

June 2026 – Present

- Working on a B2B customer-engagement platform used by large enterprises to engage their customers through AI-powered email, chatbot, and voice channels.

Promptwise — AI Creative Studio

March 2026 – June 2026

- Mapped new models into a config-driven multi-provider AI platform via per-model capability configs.
- Built async job and queue pipelines for long-running image, video, and audio generation workloads.
- Optimized media transfer using storage URLs instead of Base64 to cut peak memory and payload size.
- Engineered realtime client reconciliation to keep in-flight generations reliable across sessions.
- Built responsive, cross-client HTML emails using table layouts and inline CSS for compatibility.

Full-Stack Developer | AppQuant

May 2025 – February 2026

Next.js, Prisma, PostgreSQL, Vercel

Remote | Pasig, Philippines

- Engineered a multi-tenant, AI-powered CRM with an AI voice agent for live outbound calls via ElevenLabs, plus OpenAI-driven post-call analysis and follow-up notes.
- Built a secure Stripe payment pipeline with idempotent webhook handling, credit-based transaction logic, and subscription lifecycle handling for upgrades, cancellation, and failed-payment recovery.
- Hardened multi-tenant data access by enforcing Row-Level Security (RLS) at the database layer in Supabase, with rate limiting via Upstash Redis.
- Co-located Vercel serverless functions with the Supabase database region, reducing network round-trip latency and improving API response times.

SKILLS

Languages: TypeScript, JavaScript, Python, PostgreSQL, MySQL

Frontend: Next.js, Astro, React.js, HTML, CSS, Tailwind CSS, Shadcn UI, Motion, Zustand, TanStack

Backend: Next.js, Express.js, FastAPI, Prisma, Supabase, RBAC, Trigger.dev, Upstash Redis, REST APIs, tRPC

DevOps & Infra: Docker, GitHub Actions (CI/CD), Vercel, AWS, Cloudflare Workers, Infisical, Sentry, LangFuse

Tools & AI: Git, Claude Code, Codex, MCP, Figma, Linear, Obsidian, Postman

EDUCATION

Bachelor of Science in Computer Science

September 2021 – August 2025

Bataan Peninsula State University – Main Campus

Bataan, Philippines
